

AUSTRALIAN INSTITUTE OF
Social and Ethical
Accountability

As the number of sustainability reports released by Australian corporations grows, there are precious few places where the wide range of practitioners in the areas of organisational accountability and assurance can share ideas and talk about their practical experiences, challenges and dilemmas. The Australian Institute of Social and Ethical Accountability presents the Practitioners Talk Series as a forum to address this need.

Each Talk features a small number of speakers who lead the discussion by presenting a short case study focussing on practical issues involved in an aspect of their work. The presentations are followed by questions and discussion that allows attendees the opportunity to relate the topic to their own experiences.
